PROF GEORGIOS STAMATAKOS GETS INTERVIEWED BY THE YUAN ON THE GLOBALLY ACKNOWLEDGED EMERGENCE OF IN SILICO MEDICINE

Our VPHi member, Prof Stamatakos, released an interview for the Chinese and International platform of the technology and industry community “THE YUAN” on the emergence and the shaping of in silico medicine and its current status.

The Yuan recently spoke with Dr Georgios S. Stamatakos, father of in-silico medicine, research professor at the National Technical University of Athens, and director of the In-Silico Oncology and In-Silico Medicine Group of ICCS-SECE-NTUA, to find out about this fascinating scientific field.

The YUAN article is freely accessible at <https://www.the-yuan.com/339/In-silico-medicine-a-new-paradigm-in-modern-healthcare-emerges-in-Greece.html> (<https://www.the-yuan.com/339/In-silico-medicine-a-new-paradigm-in-modern-healthcare-emerges-in-Greece.html>) (a *free* registration to THE YUAN is requested upon accessing the article).

Alternatively, the full text of the interview can be found here (<https://www.ece.ntua.gr/en/article/530>)
